

# Twin-Wire Gapformer Newsprint machine 6800mm Gebrauchtmaschine | Artikel-Nr. 2692

## Technische Daten:

|             |                                       |
|-------------|---------------------------------------|
| Maschine:   | Twin-Wire Gapformer Newsprint machine |
|             | 6800mm                                |
| Hersteller: |                                       |
| Typ:        | Twin-Wire Gapformer                   |
| Größe:      | 6800mm                                |
| Kapazität:  |                                       |
| Jahr:       | 1974                                  |

## Beschreibung:

Gapformer Newsprint machine:

manufacturer: Beloit

type: Twin-Wire Gapformer

year of manufacturing: 1974

years of major rebuilt: 1994 - 1996 - 2006

working width at the pope reel: 6800mm

capacity: paper machine 100 000 tpy and deinking stock preparation 70 000 tpy

operating speed: 780m/min

design speed: 1000m/min

basis weight range: 40-80g/m<sup>2</sup>

raw material: waste paper, newsprint and magazine

drive side: left in paper run direction

drive voltage: 380V

frequency: 50Hz
