## Beschreibung:

---

Tissue converting and packaging line, still in production.

Available from January 2026.

It has been well maintained throughout its lifecycle and includes targeted upgrades to key components.

The system includes all process steps from unwinding to palletizing, offering a highly compact rewinder layout, two bundlers (one from 2017), and two palletizers. A wide range of conveyor units and spare parts are included. The embossing system allows for easy roll changes and supports high product flexibility.

Complete converting and packaging solution for kitchen towel and bath tissue

Compact Perini rewinder with high-quality embossing and easy roll changes

Wrapper (Casmatic T100) and two bundlers (TMC Cinque from 2017 and Cassoli IN3)

Two Langhammer palletizers (dual and single infeed configurations)

Modular conveyor systems and pack handling units (up-enders, elevators, 90° turns)

High-performance Octopus pallet wrapper (40 pallets per hour)

Modernizations include new electrical cabinets, motors, and other features

Extensive spare parts package included
