

Flexible coating system by Krönert Reko

Gebrauchtmaschine | Artikel-Nr. 6241

Technische Daten:

Maschine:	Flexible coating system by Krönert Reko
Hersteller:	Krönert REKO 800
Typ:	Flexible coating machine
Größe:	1580mm
Kapazität:	200m/min.
Jahr:	None

Beschreibung:

Flexible coating system for water- and solvent-based media, which is used for the manufacture of semi-finished products for flexible packaging and technical products.

Main application:

- **Flexible packaging:** Manufacture of semi-finished products for flexible packaging.
- **Technical products:** Coatings for technical applications.
- **Labels/adhesive films:** Manufacture of label materials
- **Functional coatings:** Application of barrier layers or pressure-sensitive adhesives.

Main features:

- **Flexibility:**
 - Suitable for water-based and solvent-based coating processes.
- **Sleeve change:**
 - Enables quick change of the application sleeve without tools and without interrupting the material web.
- **Versatility:**
 - Processes materials such as paper, polymer films, and aluminum foils in roll form.
- **Drying technique** (conveyor belt dryer) permits converting of tension sensitive materials e.g. PP, PE
- **Quick change** of coating technique (trolley technique)
- **Corona treatment**
- **Displaceable inline dosing system** for high reactive 2-component systems available
- **Inline measurement** of coating weight (retrofit 2019)
- **Ultrasonic cleaning system** for coating rollers and devices

General specifications:

manufacturer	KROENERT RECO 800
speed	5-200m/min
Coating systems	Dispersion + solvents
reel change	Flying roll change
total width	1580mm
working width	1530mm
