Wachsbeschichtungsanlage 400 mm Breite

Neue Maschine | Artikel-Nr. 6348

Technische Daten:

Maschine:	Wachsbeschichtungsanlage 400 mm Breite
Hersteller:	Asian
Typ:	None
Größe:	None
Kapazität:	None
Jahr:	2025

Beschreibung:

Cross-cutting function: yes

Melting tank temperature: room temperature to 100°C (by water) or 140°C (by oil). Can be thermostatically controlled.

Melting tank heating: hot water or heat transfer oil insulation system

Melting tank capacity: 30l

Glue supply system: automatic glue supply (with heating)

Cool drying oven: 2m

Cooling method: air compressor cooling (1HP x 2 units)

Unwind / Rewind shaft: 3-inch

Unwind / Rewind diameter: 500mm diameter for both

Power supply: 380V. 8000W

Control sytem: independently developed

HMI: 10-inch touch screen english

Coating width: Max. 400mm

Coating method: beewax heated coating (customized)

Coating thickness: adjustable

Machine speed: 1-8m/min (coating speed adjustable depending on drying conditions)

Tension control: automatic tension control
